

UNYQ CustomFit GO

Reimbursement & Clinical guide

USA

1. When to Prescribe CustomFit Go

Prescribe this cover when your primary goals are basic component protection, daily scratch resistance, and clothing protection, aligned within standard L5704/L5705 fee schedules.

2. Suggested Billing Codes

L5704 Custom shaped protective cover, below knee (BK).

L5705 Custom shaped protective cover, above knee (AK).

3. Medical necessity reasons

- **Component Protection:** Shields expensive prosthetic parts (pylons, adapters) from daily impacts and dust.
- **Fall prevention:** 100% custom fit prevents the cover from interfering with the joint's range of motion.
- **Biomechanical Support:** Restores natural volume, improving symmetry and reducing compensatory gait issues.
- **Clothing Protection:** Prevents the mechanical parts of the prosthesis from snagging or tearing the patient's garments.

4. Clinical chart note

Just copy this text directly into your clinical notes (DWO) to justify medical necessity for the insurer:

"The patient requires a custom-shaped protective cover (L5704/L5705) to shield internal prosthetic components from daily wear, impacts, and dust. A custom-engineered fit is medically necessary to ensure the prosthetic components maintains its full range of motion without mechanical interference, mitigating fall risks. Furthermore, the cover prevents premature damage to the patient's clothing and restores anatomical volume, which improves proprioceptive symmetry and reduces compensatory gait abnormalities."
