

UNYQ[®]
like no other

Innovation

At the core of our identity is innovation. We lead in developing new products, designs, materials, and technologies to meet the expectations of professionals and users. Each prototype, color, and material is carefully chosen and tested to deliver innovative solutions that enhance patients' daily lives.

Easy process

Our simplified ordering process is easy and flexible for any clinic. Whether using our app or online platform, taking photos and measurements, or working with a 3D scan, our system offers a variety of options to suit each clinic's preferences, making the customization and purchasing process fast and simple.

UNYQ[®]

Quality

We aim for quality in every detail. Designed for a perfect fit, our products are crafted using an advanced multi-injection 3D printing process with the best materials, and finished to a high standard through meticulous hand post-processing. Every UNYQ product ensures both functionality and aesthetics, meeting the highest standards of quality.

Here for you

Becoming a reliable partner for the clinics that trust us is key, offering not only exceptional products but also a service that allows them to focus on patient care. Our dedicated customer service team ensures a smooth, hassle-free process for professionals, from initial training to post-sale support, saving time and maximizing user satisfaction.

For everybody, for every body

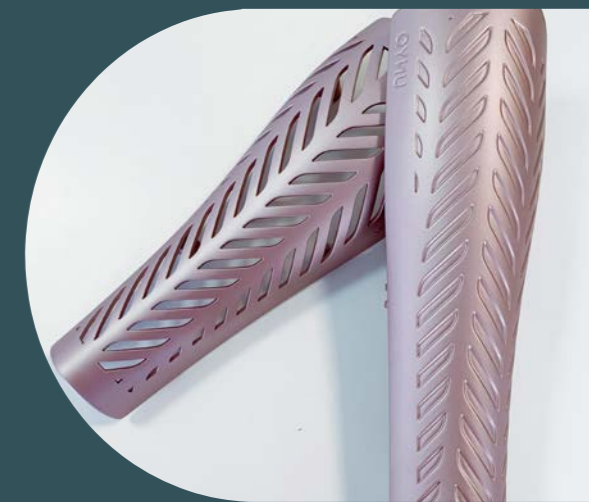

Options for any lower
limb amputee

CustomFit

Our ready-to-fit covers line available for selected prosthesis. Protection and anatomy with just a cut!

KneeFit

Joint covers

Our joint cover for prosthetic knees.

CustomFit

Custom covers
Firm & Flex

TF / TT

100% CUSTOM

Designed to fit each prosthesis and body, personalized combining a wide range of designs and colors for a unique look.

HYGIENE

The smooth, polished surface makes our covers easy to clean with a damp cloth and allows quick access for cleaning components, promoting optimal hygiene.

EASY TO FIT

In seconds! Secure the front to the tube with our Fast-Clamp or C-Clamp (screws), and connect the back using strong magnets or screws for a secure fit and easy access to prosthesis components.

PROTECTION

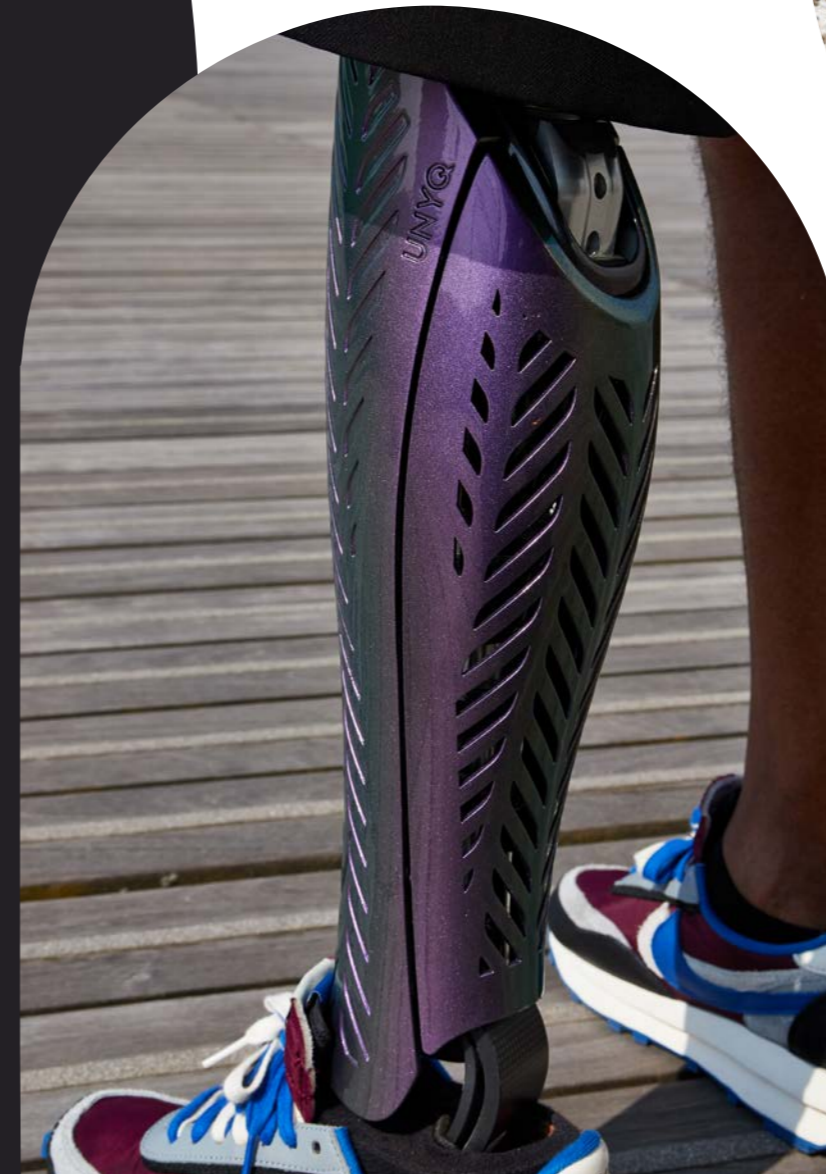

Made from durable hard or flexible materials, our covers offer superior protection for prosthetic components, extending their lifespan and ensuring lasting reliability.

ANATOMY

Custom-designed for each user, our covers mirror the natural shape of the sound leg, fully wrapping the prosthesis with a seamless contour to restore anatomy, enhance aesthetics, and support emotional recovery.

DURABILITY

Our covers maintain their shape without deforming, are water-resistant, and lightweight (300 to 700 grams depending on anatomy), offering comfort and perfect for daily use.

CustomFit **FLEX**

Crafted from flexible material, providing enhanced resistance and protection for more active users, ensuring both comfort and a personalized touch for those who lead dynamic lifestyles.

- ◆ TF & TT prosthesis
- ◆ Flexible material (TPA)
- ◆ +10 designs, +40 colors
- ◆ Glossy or satin
- ◆ Delivery: 3 weeks

CustomFit **FIRM**

Our original signature covers made from robust, firm material. Designed for users who prioritize protection, anatomical fit, and style, these covers are ideal for daily activities without high impact. They ensure users can look their best while enjoying reliable support for their everyday needs.

- ◆ TF & TT prosthesis
- ◆ Firm material (PA12)
- ◆ +20 designs, +40 colors
- ◆ Glossy or matte
- ◆ Delivery: 3 weeks

OneFit

Complete solution

TF

OneFit is our innovative solution that replicates the **complete anatomy** of the leg, from the socket to the ankle, ensuring **full coverage** with no gaps. Specifically designed to **protect all prosthetic components**, it includes a functional joint that allows natural knee movement without compromising functionality.

Fully **customizable** in design and color, OneFit helps users regain their full anatomical shape with an impeccable aesthetic, boosting their confidence and supporting their emotional and **psychological recovery**, while protecting their prosthetic components.

Complete coverage, maximum protection

- ◆ For TF prosthesis (C-Leg 4, Genium, Kenevo, 3R80, Rheo/Rheo XC, Quattro). More options coming!
- ◆ Firm material (PA12)
- ◆ 20 designs, all our colors
- ◆ Matte or glossy
- ◆ Delivery: 3-4 weeks

Standard care

QuickFit

Ready-to-wear covers

TF

QuickFit Covers – our semi-custom solution for transfemoral prostheses – provides a ready-to-fit option for your patients. Crafted from durable Firm material, these covers offer reliable **protection** for prosthetic components. Available in two **adjustable sizes**, they can be easily adjusted in length in the clinic to fit a wide range of users with standard anatomy.

With no need for photos or measurements, QuickFit Covers can be stocked for immediate use, allowing patients to walk out with a protective cover in a **single appointment**.

Ideal for new users trying out a cover for the first time or for those seeking simple, effective protection without the need for customization.

- ✦ TF (specific knees)
- ✦ Firm material (PA12)
- ✦ 9 colors - satin
- ✦ 2 sizes (S, L)
- ✦ No photos/scan
- ✦ Fitted with screws/magnets
- ✦ Stockable
- ✦ Delivery: 2 weeks

C-LEG 4 / 3R80 / GENIUM / KENEVO / QUATTRO / RHEO XC / 3R85 DYINION / ALLUX

KneeFit

Joint covers

TF

KneeFit covers provide **articulated protection** for knee joints in transfemoral prostheses. 3D printed from durable Firm material, they ensure full protection for prosthetic components while allowing full **functionality** and freedom of movement.

Designed for each knee type to ensure a perfect fit, KneeFit fills the gap between the knee and socket, creating a seamless, natural look and preventing clothing from being pinched or damaged. Ideal for users who prioritize protection with discreet aesthetics.

Available in a **single size and shape** for each knee type, KneeFit can be fitted in seconds without photos or scans. With a 14-day delivery time, this convenient solution can be kept in stock, ensuring fast, quality service for patients in just one appointment.

- ✦ TF (specific knees)
- ✦ Firm material (PA12)
- ✦ 9 colors - satin
- ✦ Ready to place

C-LEG 4 / 3R80 / GENIUM / KENEVO / QUATTRO / RHEO XC / 3R85 DYINION

Let's redefine patient care, together.

+10 years

+40 countries

+700 clinics

+10.000 users

With over a decade of leadership in the global prosthetic cover market, UNYQ continues to set new standards in the prosthetics industry. Our commitment to innovation and user experience has helped us empower lower limb amputees around the world. At UNYQ, aesthetics and functionality go hand in hand, enhancing both the look and quality of life for users worldwide.

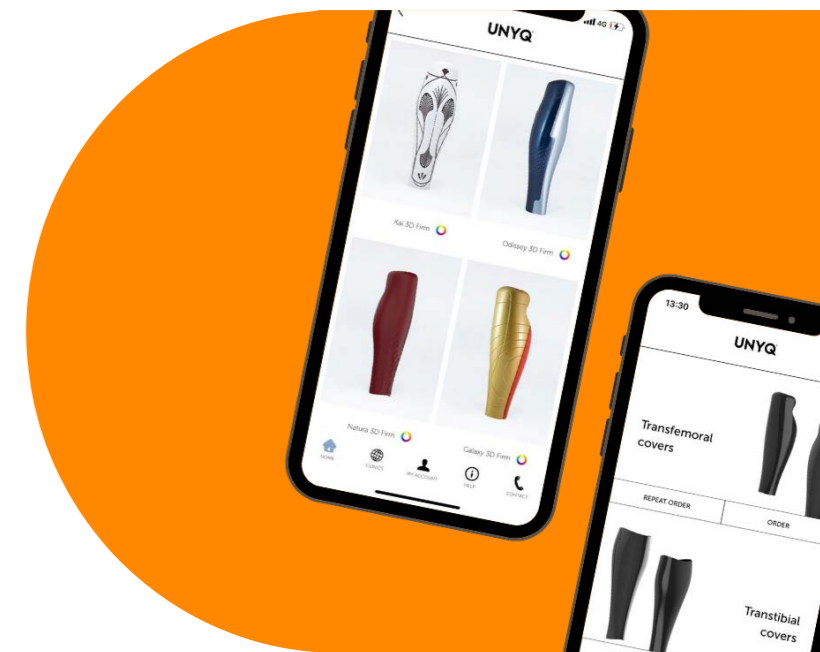

How to order

Choose your system

UNYQ APP

We've eliminated the need for 3D scanning to customize our CustomFit covers with our easy-to-use app. It guides you step-by-step through taking photos and measurements directly from your mobile device, allowing full personalization to the user's anatomy and prosthesis. Available for iOS, with Android coming soon!

- **CustomFit** (photos)

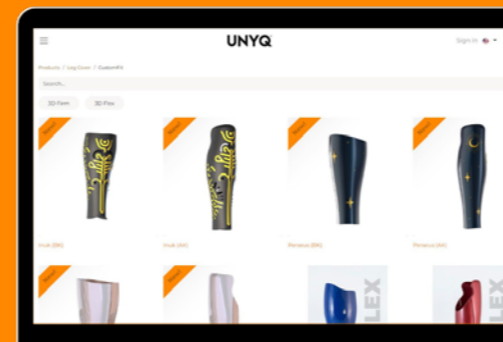

UNYQ.COM

Our online shop lets clinics easily configure products by selecting the type, design, and color, and upload the required files—whether it's a 3D scan or photos and measurements. You'll find detailed instructions for both processes during checkout or in our Resources Center.

For products that don't require customization, simply select your options and complete your purchase online!

- **CustomFit** (photos or 3D Scan)
- **OneFit** (3D scan)
- **QuickFit**
- **KneeFit**

Ordering options for every clinic

If your clinic is unable to use the UNYQ App or website to place an order, simply contact us at hello@unyq.com. We'll provide you with easy-to-complete Order Forms, so you can fill in the product details and email them to us along with any required files.
